

```
function chronos() {
    now2 = new Date();
    tdr = now2.getTime();
    tdrmilliseconds = Math.round(tdr-startstimulus);
    tempsdereaction += "\r"+tdrmilliseconds;
}

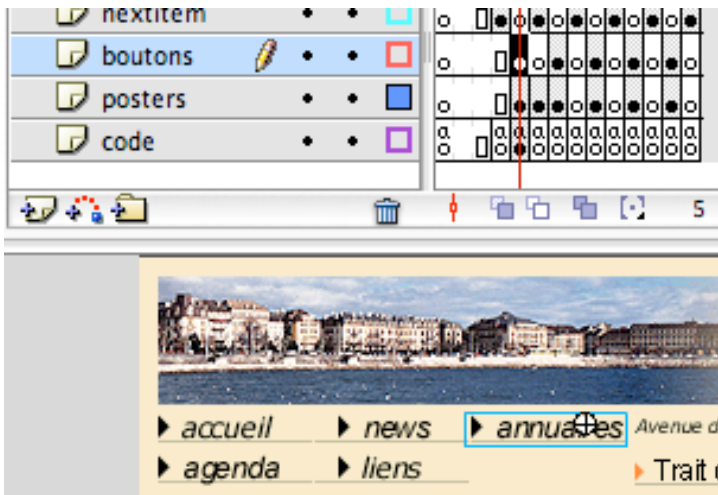

```

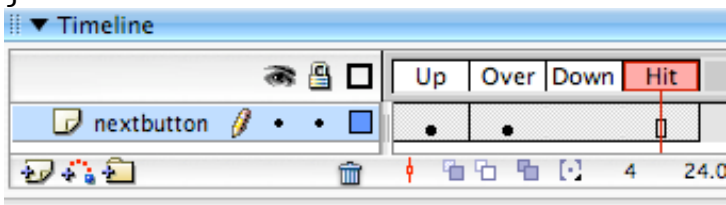

“scores” = champs de texte dynamique pour afficher la variable “tempsdereaction” dont la valeur est calculée dans la fonction “chronos()”

```
now = new Date();
startstimulus = now.getTime();
stop();
```

```
on (press) {
    chronos ();
    nextFrame();
}
```

```
bouton nextFrame();
```
